

AVITUS GROUP™

November 25, 2019

To Our Valued Avitus Group Clients:

Avitus Group has a long history of meeting the high standards of the voluntary CPEO program. We were one of the first PEOs to apply for and obtain certification from the IRS in 2017, and since then have contracted with a third-party audit firm to validate that we are fulfilling our obligations for our clients with the IRS.

On Friday, November 15, we were informed by the IRS that our “certified” designation had been suspended due to a delay in our financial audit review. This suspension does not impact Avitus Group’s ability to perform any of the services we provide to you or any of our other clients.

Over the past week our top priority has been to get sufficient information from the IRS to provide you with a concrete update on our suspension from the CPEO program.

You may **click here** to view our most recent third-party report which provides validation that we met the IRS requirements. We are happy to make future reports available to you as well.

As our team works through this issue, I assure you that you remain fully supported in all aspects. This suspension does not in any way impact our ability to do business, as it is a voluntary certification pursued by only a small percentage of PEO companies. We remain committed and able to fulfill our mission to offer outstanding care and service to all of the clients who place their trust in Avitus Group.

If you have any questions about this, please contact your Account Manager.

Sincerely,

Andrew Lindley
Chief Operating Officer
